Hi folks

Attached is a draft of the social science section of the science plan. We are using the NLCS template and differs from previous versions you may have worked on. This section contains wilderness, visitor resource management and recreation, and local economies. The other sections of the NLCS template with notes are included in the draft (highlighted in gray) so you can see the context of the overall document but these sections do not need editing.

Yellow highlights are questions for the respective specialist. Blue highlights are notes to me. There are about two pages to review and at a minimum. This will NOT be a time sink I guarantee.

If I could please get comments back by **July 26**, I would be delighted and you will avoid be wrangled. Travis please feel free to send to others in your division.

Thanks in advance.
